mobility and skills
recognition across Europe!

European Workshops

European Workshop on Competence Recognition

In **November 2025**, partners met in **Aix-en-Provence** for a key workshop hosted by **GIP FCIP**. This milestone led to a shared methodology for self-assessment, psychosocial skills development, and competence recognition through micro-badges and Europass Mobility, alongside a **common competence framework** and practical implementation tools.

Online Workshop Supporting Apprentices Through Their Mobility Journey

On **29 April 2026**, apprentices from partner countries came together for an **online workshop** hosted by **GIP FIPAN**. Participants discussed common mobility **challenges**, exchanged **experiences** with peers, received **guidance** from mobility experts, and strengthened the sense of belonging to a **shared European mobility community**.

3rd TPM in Athens

In **April 2026**, QualiTEAM partners met in **Athens** for the 3rd Transnational Project Meeting, hosted by **ReadLab**. Discussions focused on **mobility implementation**, monitoring tools, and upcoming deliverables. Partners aligned on solutions to ensure quality placements and consistent learner support, while also **launching Work Package 4** on skills recognition. The meeting reinforced collaboration and marked a key step toward the project's final phase, strengthening a **shared approach** to apprenticeship mobility across Europe.

Future Steps!

Apprentice Mobilities Progress

Mobilities are advancing steadily across partner countries, with **29** out of **36** placements already underway, confirmed, or in preparation. If you are looking to develop your **cross-border, long-term apprenticeship experience**, join us on this journey of skills, learning, and European cooperation!

Advancing Skills Recognition & Final Phase Implementation (WP4)

Work Package 4 is now underway, building on the pilot mobilities. QualiTEAM is using **Europass Mobility** to record technical skills and **micro-badges** to recognise transversal skills like communication, teamwork, and adaptability. This helps make apprentices' learning clear and **transferable** across countries.
